Crista Hassett

SVP of Education, Events and Association Services
NAMIC

Ryan Frisbie

Partner
Viewpoint Ventures

10:30 – 10:55 a.m.

Fastpitch Session 1 – Swiss Re

Identifying the right data and leveraging it to improve portfolio performance can be daunting. That's why Impact+ was created: to help insurers access the right data for profitable growth and only the data they need – without all of the noise. The more you know, the more accurately you can underwrite. But in a world full of data, how do you know what's right for you? How do you use it to your advantage?

Introducing Swiss Re Impact+, your data superstore. Get the right data to make the right decisions, improve portfolio performance and find new areas for growth. Impact+ is a customized data package that integrates with your own data and works effortlessly on your system. Derive insights from reliable sources of information, understand the risks affecting your properties, connect the individual risk to your portfolio. Swiss Re Impact+ shows you a clear path to sustainable growth. We focus on the data so you can focus on your customers.

Duare Perez

Head P&C Analytics, Americas
Swiss Re

11:00 – 11:30 a.m.

Fastpitch Session 2 – ZestyAI & Closing Comments

AI is getting a lot of attention for generating original artwork, drafting essays, and even spitting out images for dating profiles. Our products are used by insurers and real estate companies to access precise intelligence about all details that could impact a property's value and associated risks, including the potential impact of natural disasters. Join us to learn how the insurance industry can harness this exciting and powerful technology to its benefit.

WEDNESDAY, JUNE 14

9:30 – 9:45 a.m.

Opening Session: The Future of Insurtech 2023

Dr. Kaenan Hertz

Managing Partner
Insurtech Advisors

9:50 – 10:15 a.m.

Fastpitch Session 1 – Majesco

Three crucial property/casualty insurance market trends – the pressure for underwriting profitability, particularly given 2022 loss ratios; the increasing focus on enhanced risk assessment; and increased priority in advanced analytics, including predictive artificial intelligence/machine learning capabilities – are rising as top priorities for insurers to improve customer experience, underwriting profitability, and financial results. As the digital age continues to advance insurers into the future, advanced embedded data and analytics capabilities are increasingly important to identify business insights at the right decision points at the right time. Today's insurers rely heavily on data to make informed decisions, reduce risks, and provide customized solutions to their customers. Powerful advanced analytic solutions using AI, ML, NL, and rich sources of data help carriers uncover strategic insights and drive innovation, growth, and profitability.

Pat Davis

Senior Vice President & General Manager for Data & Analytics
Majesco

WEDNESDAY, JUNE 14 CONTINUED

10:20 – 10:50 a.m.

Fastpitch Session 2 - ION – Insight.Onsite.Now

ION – Insight .Onsite. Now.™

At the speed of now, you can reduce your time to decision by 70 percent. ION delivers accurate, complete, and actionable field inspection insights, which are critical to the success of your claims response program and the entire claims experience. Instant field insights, advanced onsite technology, and prebuilt application programming interfaces increase speed to claims decisions and give you greater resource capacity and streamlined operations. Control the trajectory of claims through securing your field inspection data within minutes of the completed assignment.

WEDNESDAY, AUGUST 9

9:30 – 9:55 a.m.

Opening Session: Insurtech 2023 – Tech & Trends Driving Innovation

Jason Gross

Vice President & Head of Platform

ManchesterStory

10:00 – 10:25 a.m.

Fastpitch Session 1 – Chrp Technologies

Net/Net Chrp is low cost and requires very little time and IT reliance to implement while providing huge value. Chrp Technologies uses artificial intelligence to analyze home inspections to prevent losses and improve underwriting precision. The Chrp platform includes a self-inspection app with the highest conversion rate in the industry, home condition analysis by AI trained by construction experts, and underwriting automation for all communications between the insurer, insured, and agent – all at a fraction of the cost of a traditional inspection. Chrp customers have experienced a 5 percent to 8 percent decrease in loss ratios, a more than 50 percent reduction in non-cat claims frequency and severity, a 75 percent savings on home inspection costs, and a reduction from 30 or more minutes to one minute to review a home inspection report.

Zane Koeller

Vice President, Sales & Marketing

Chrp Technologies

10:30 – 10:55 a.m.

Fastpitch Session 2 – Guidewire

The Guidewire Data Cooperative pools anonymized and aggregated property/casualty data to maximize loss ratio improvement and confront property/casualty industry pain points. By pooling data, every participating carrier gets the benefit of the full breadth of the cooperative for benchmarking performance to identify areas of strength and improvement as well as the ability to use and create more powerful predictive models to improve decisions at all points in the insurance lifecycle.

Satyen Paneri

Product Marketing Principal

Guidewire Software

11:00 – 11:30 a.m.

Fastpitch Session 3 – Swifter & Closing Comments

Swifter offers a composable no-code digital layer that empowers insurers with best-in-class digital capabilities. The platform integrates with core systems and supports any product line, including personal P&C, Life & Annuities, and Commercial P&C (such as SMBs). With Swifter, insurers can build, test, and launch new business processes, product journeys (e.g., for quote & bind) and internal workflows based on real-time connectivity between systems just in days. The platform provides accessible digital capabilities - it helps to streamline solution development with an intuitive, no-code, drag-and-drop interface.

Itay Even-Chen

9:50 – 10:20 a.m.

Fastpitch Session 1 – ChainThat & Closing Comments

ChainThat, an Xceedance company, provides innovative SaaS-based insurance technology products that allow brokers, carriers, and MGAs to realize the full potential of their business. ChainThat was created in 2015 to enable insurers to face tomorrow's challenges by creating simple, practical solutions to their everyday problems. In 2020, ChainThat became part of Xceedance Group. We're different from most insurtechs. Built by insurance tech professionals, we understand the business from the inside out, have seen at first hand its challenges, and think we have some of the answers. With customers across three continents, we provide proven cutting-edge technology platforms for the insurance industry. Beyond Policy Administration (BPA) is a modern, cloud-native policy administration system built specifically to meet the needs of today's insurance industry. It provides digital integration, advanced analytics, customer-centricity, speed, flexibility, and optimized costs.
